

Go Green Initiative!

There is something very special about the Eau Claire community and surrounding area. Each day, we see the beauty of that community and the entrepreneurial spirit which makes the Chippewa Valley an inviting place to live, work and share. Preserving the beauty of our environment will leave our children and grandchildren with the same special standard of living we are enjoying today.

To help preserve our environment the Eau Claire Community Foundation has launched a green sustainable procedure to promote environmentally safe and sustainable business practices and operations within our office. Just a few small changes can make a big difference. We are applying to be accepted by the Eau Claire Chamber of Commerce as a member of their Green Sustainable Initiative (for more information see the website at http://www.eauclairechamber.org/CWT/External/Programs/Green_Business_Initiative.aspx).

We now have a special request for you to help us with this effort. Send us a note at info@eccommunityfoundation.org to receive our newsletters via e-mail. This will reduce the impact of mailing a paper newsletter. Your e-mail addresses are secure at the Eau Claire Community Foundation and will be used only for our newsletters. Thank you for helping us to save and take care of our environment.
